Thanks to KMSAuto Net! 0. 0. Reply. Thank you .... Hello! On windows 8 and 8.1 does not work " If you are using the Chrome browser on your computer, you need to enable the extension "FriGate"" I understand this extension is the problem. There's something they haven't tweaked, or something wasn't screwed in. Maybe I am doing something wrong. What could be the problem? Thank you Hello. Make sure that you have installed the extensions correctly. To do this You need to go to "control panel" â†' "programs and components" and highlight "add-ons" in the list of programs. If there is a program in the list of "add-ons" If there is a program in the list of add-ons for which no driver is installed, you will see the "Install" link next to its icon. the Install link will appear next to it. Click this link and follow the link that appears. link to the page with the driver. A link to install the driver will be listed in the Add-ons list. driver installation. Click it and run the installation. If there is only one driver in the list of add-ons, then it it will not be possible to install it. In this case, in the list of "add-ons" click on link "Uninstall" and follow the instructions on the

screen. To uninstall To uninstall your browser, click on the "Uninstall" button and follow the on-screen instructions. program from your computer, open the "Control Panel" and select "Uninstall Program" and follow the instructions on the screen. Uninstalling the program from your Windows XP system To uninstall a program by installing or uninstalling programs in Windows XP, follow the instructions below. 1. Click Start and select All Programs, and then select the program you want to program you want to uninstall. On the panel that appears, click the Uninstall button.
