Was my opinion based on the video posted by the developer? No. Was my opinion based on my opinion of the developers and what they have posted? Yes Pros: -Overcomplicating game mechanics to the extreme. -Very well made gameplay mechanics. -Absolutely fantastic sounds. -Absolutely absurdly hard. Cons: -Unbearable micromanaging. -Slow enemies. -No save points. -Very slow pace. -Playing on mute, so the sounds have lost nothing. -May possibly require a "Health"-status (very difficult) like the game "Last Starfighter". -Music is the same, no way to adjust it. -Music is very loud. -Controls not very usable. -Very few weapons. -Many items required -Game seems to be all about killing, not surviving. -Enemies do not get stuck in certain spots. -Unclear when to start fighing. -Each time you lose, you have to restart. -No hidden costs. -No audio cues for the enemy's location. -No option for display settings. -Overly-explanatory setting screens. -Music starts playing at the same time for every enemy. -Incredibly repetitive gameplay. -No explanation on what enemies are. What "Bernie's Nightmare" Does Well: -Good game design. -Terrifying enemies. -Challenge as the objectives are unknown at first. -Many object to defeat. -Visually pleasing. -Fun and fast. -Lots of audio. What "Bernie's Nightmare" Does Not Do Well: -No auto save. -Music must be completely off. -Eliminate common enemies. -Mixed items may require a barf bag. -Game is to difficult. -Players guide does not contain much info. -Player must guide many items to defeat it. -Sound design. -Character is very slow. -Controls very hard to use. -Very little explanation. -Many rooms and areas to search. Summary: Game "Bernie's Nightmare" contains a lot of bad things, but also a lot of good things. Even though this game is quite a bit of work, the developer has done very well with such a

small budget. Based on my opinions, which can be biased,

The Jans Token Pack 07 that I released a couple weeks ago, is now released and available for free. This pack has a script to edit your files so that it can be easily changed to suit your needs, It was done so that any future packs this group puts out can also be edited the same way. (At least until we learn advanced scripting languages and its too late for 4.2 lol.)

So whats included in this pack? I included over 100 spells, items and more!

Each script in this pack is given a number higher than other packs I have done. (Ok maybe 6 is more accurate lol)
