## **What's new:**

**: Escape From Zombies Island is a 3D fusion of classic arcade platformer 2D stages and adventure games. Although the game does not use any proprietary 3D engine, the project was mostly developed with Unreal Engine 4 as 3D tools are much better suited for the project. Additionally, the game was published in the then new Unreal Engine Marketplace, so the developer decided to make their entire engine available for sale. The game was developed by Spycow, a Polish company that are best known for their Angry Birds clone Fox Bomber Games B-017. The game was originally released in the Polish Entertainment Software Rating Board's Indiegogo campaign in 2013. The game had exceeded its funding goal within 48 hours and days. The initial publication was delayed several times due to quality issues, and due to financial issues they gave their shares to well known mobile game developer Strongsoft to publish and distribute the game. The game was not only developed independently of Strongsoft, but was actually funded by Spycow themselves and Strongsoft knew nothing about the project. After the game was published, the developer later attempted to sue Strongsoft for publishing an unfinished product.**

**Gameplay Setting The game takes place on an island inhabited by escaped prisoners. In the game the players guide an action hero faced off against zombies and robot guards. The players are given the mission to find a hidden artifact and transport it back to their owners. Because there is a big difference between zombies and robot guards, the players must use clever tactics to defeat them; otherwise the games will be really short.**

**Story The story is centered around the actions of one character that basically ends up playing a recurring roll throughout the game. The player's hero is Bob, who is in the middle of a fight to get the artefact. As the game progresses Bob, along with two other intrepid mystery men embark on a time consuming expedition to the very location Bob failed to return from, and eventually ends up on the island where he began the quest, in order to rescue his girlfriend and retrieve his lost artefact.**

**Plot Bob is a man with strong morals. He doesn't really like violence and he usually fights for the people that need him. One day, the Boss came to his house and told**

---

**him that his girlfriend has been kidnapped by thieves. Bob is offered a chance to save her, but he is not allowed to use his guns. After hearing such a thing Bob decided to keep his guns but not for the sake of combat. He started to think to himself "**
