Animal Crossing lets go to the city for the Nintendo Wii has been a very popular title on a variety of platforms which included Nintendo Wii, Nintendo DS and the Nintendo DSi. Animal Crossing lets go to the city has been a very popular title on a variety of platforms which included Nintendo Wii, Nintendo DS and the Nintendo DSi. Nintendo DS. Animal Crossing lets go to the city has been a very popular title on a variety of platforms which included Nintendo Wii, Nintendo DS and the Nintendo DSi. Animal.Q: Maximum likelihood estimator for θ Let X_1, X_2, \dots, X_n be i.i.d. from $N(\theta; \mathbb{R})$ where $X_i \sim \theta$ and $N(\theta; \mathbb{R})$ denotes the normal family. Let $Y = \min(X_1, \dots, X_n)$. My question is: what is the maximum likelihood estimator for θ . As I guess this is an exercise on the topic of statistics, the title of the original problem is a bit misleading. I know that $N(\theta; \mathbb{R})$ denotes the "class of the continuous distribution", but I'm not sure what to make of this. A: One way to look at it is that if $X_i \sim N(\theta, 1)$, then X_1, \dots, X_n is a sample from the standard normal distribution. If θ_0 is unknown, then the maximum likelihood estimator is 570a42141b
